• [Github : vaishnavidhobale](#) • Add: 17/3, Daulat Plaza, Lohegaon, Pune, Maharastra 411047.

Summary

Full-Stack Developer with hands-on experience in MERN stack and Java technologies. Skilled in MongoDB, Express.js, React, Node.js, Java, Spring Boot, JavaScript, and SQL. Passionate about building efficient, user-friendly web applications and contributing to professional development projects.

Experience

Leads4Needs | [Certificate](#)

Noida

02/2022 - 04/2022

Worked at Leads4Needs for 3 months as a Full-Stack Developer, contributing to MERN stack projects. Gained hands-on experience in building and maintaining web applications, optimizing backend processes, and implementing responsive user interfaces for seamless user experiences.

Education & Certifications

Vinsys in collaboration with Generation India | [Certificate](#)

03/2025 - 07/2025

Full-Stack Java Development

Masai

08/2022 - 05/2023

Full-Stack Web Developer | MERN Stack

Bachelor In Computer Engineering

04/2021 - 09/2024

Diploma In Computer Engineering

08/2018 - 08/2021

Projects

DefencePost | Repo

DefencePost delivers unparalleled study materials, offering the most comprehensive and effective notes to empower CDS students on their path to success. **This project was my individual initiative, where I developed and structured all aspects to meet the unique needs of CDS aspirants.**

Tech Stacks : React, Chakra UI, Express JS, MongoDB Atlas, Razorpay, Postman.

- Optimized data handling, which reduced loading times by 30%, enhancing the user experience and performance for all users.
- Successfully implemented responsive design for seamless mobile and desktop access, allowing over 60% of mobile users to access the site effectively
- Designed and developed an Admin Panel to efficiently manage courses, posts, coupons, testimonials, admin accounts, and user data, with the ability to add, update, and manage content dynamically.
- Created a more stable backend architecture using the MVC structure, which handled data more efficiently, reduced downtime, and supported more concurrent users.
- Built an authentication feature, boosting data security and providing a seamless login experience for all users.
- Delivered the project individually within a tight two-month timeline, successfully meeting all feature and functionality requirements.

Buyify | Repo

Cloned the Amazon website to replicate its core functionalities, including homepage design, product listing, user authentication, and responsive UI, using modern web development technologies. Implemented a user-friendly interface and optimized the design for seamless navigation and performance.

Tech Stack : React, Chakra UI, Express JS, MongoDB, Postman.

- Cloned the Amazon website as part of a group project, **where I was responsible for designing and managing the backend code.**
- Achieved smooth and efficient API performance, supporting fast response times for product browsing and checkout processes.
- Designed a scalable database structure to handle large datasets, ensuring the platform can support multiple products and users without performance issues.
- Implemented secure user authentication, enhancing data protection and providing a reliable login experience.
- Completed and deployed the Amazon website clone project within a 10-day timeline, efficiently managing tasks and ensuring timely delivery.
